

# Take the Short Way Home

Dionne Warwick

You've been makin' up your mind  
And I can save you from the trouble that your heart is goin' through  
And I can tell you what your future's gonna be  
Maybe we can open up your eyes  
Baby, you can't leave me now

There is lightnin' in the city  
Stranger than you ever saw  
Get back to your special lover  
And I won't ever turn on you  
Or tell you you should tell me where you go

And take the short way home  
Baby, take care of your health  
In this world of evil  
I can't keep you to myself

Take the short way home  
You'll be safe here by my side  
In this world of evil  
I can't keep you satisfied

And you can make it easy on yourself  
Some other love will call my name when you're away and I'll be gone  
And there's no other who could love you more  
I keep talkin' to myself when I'm alone  
I don't wanna be alone

Crazy people in the shadows  
Love is only what you find  
Come back here and you'll discover  
There ain't nothin' you've been searchin' for  
I could not give you now if you are gone

Take the short way home  
Baby, take care of your health  
In this world of evil  
I can't keep you to myself

Take the short way home  
You'll be safe here by my side  
In this world of evil  
I can't keep you satisfied

Crazy people in the shadows  
Love is only what you find  
Come back here and you'll discover  
There ain't nothin' you've been searchin' for  
I could not give you now if you are gone

Take the short way home  
Baby, take care of your health  
In this world of evil  
I can't keep you to myself

Take the short way home  
You'll be safe here by my side

In this world of evil  
I can't keep you satisfied

Take the short way home  
Baby, take care of your health  
In this world of evil  
I can't keep you to myself

Take the short way home  
You'll be safe here by my side  
In this world of evil  
I can't keep you satisfied

Take the short way home  
Baby, take care of your health  
In this world of evil  
I can't keep you to myself
