With a Touch

Dionne Warwick

When people question
How did our love get started
I always tell them
It's very clear to see

If you have it in your heart
Then within you
You hold the key for answering
The very question that you're asking me

With a touch of my love
And a touch of your love
A touch of our love

When people say that
Time will take with it our feelings
My only answer
To them is that we will see

For when two hearts beat as one
In rhythm for eternity
Know yourself
Exactly what the outcome's gonna be

With a touch of my love
And a touch of your love
A touch of our love (With a touch of my love)
With a touch of my love
And a touch of your love
A touch of our love (With a touch of my love)
With a touch of my love
And a touch of your love
A touch of our love (With a touch of my love)
With a touch of my love
And a touch of your love
A touch of our love (With a touch of my love)
With a touch of my love
And a touch of your love
A touch of our love (With a touch of my love)
With a touch of my love
And a touch of your love
A touch of our love (With a touch of my love)
With a touch of my love
And a touch of your love
