

Never Gonna Die

Direct Hit!

Do you ever wonder where you'd land if you dug too deep through the earth and the sand
And found yourself deep inside a land where subatomic rationale is all that matters you can't
Unsee the darkness from that plan and so you just keep staring til your nerves all detach
And make it painless to know you can't reduce the universe to ones and zeroes, circles and plans?
You know your truth!

Do you ever wonder what's it's like to feel omnipotent a little bit?
I'll tell you you can't
Come back from that kind of mental state and feel complete again - I'll bet your gods and sons would relate

Cause everybody's got a price that they'd be willing to pay
To scratch that itch and know the truth about their purpose today
Another way to stay awake and try again to maintain
So what's the goal? It's easy: never sleep, and be in your place!

No, you're never gonna die, no you're never gonna die
All you gotta do is fuckin' live your life
No, I never gonna die, never never gonna die
All you gotta do is fuckin' roll that dice

Do you ever wonder what it's like for anyone who calls it given that their death is in sight?
Do you remember how it felt when you found out how to trash all the cards you'd been dealt?
And do you ponder where you'll be when centuries have past and we're still here? Can't you see?
Oh, what a buzzkill - no one left just the servers and their video, let's call it a test

Cause now you've got a debt to Beacon you can never repay
You should feel thankful you're alive and still here anyway
You've got the nerve to come around and ask what it's all about
Without the dedication needed to move forward without it?

No, I never gonna die, never never gonna die
And no one's gonna tell me how to live my life
No, I never gonna die, never never gonna die
And no one's gonna tell me how to live my life

You stop yourself from closing your eyes!
You stop yourself, you live your life!
You stop yourself - the fear is real
But not the way your pain will feel!

You stop yourself from closing your eyes!
You stop yourself, you live your life!
You stop yourself - the fear is real

But not the way your pain will feel!

Never, never gonna die!

And no one's gonna tell me how to live my life

No, I never gonna die, never never gonna die

And no one's gonna tell me how to live my life

...
