

No Studying

Dirty Projectors

I know you're ready
That's why you test me

You think I don't know
You think I could not bother

Get your hands steady
Wipe the sweat already

Did it ever occur to you
Maybe I've seen things?

There's no studying prepares a heart
For where you're going
There's no way the things you heard
Compare to how it feels
You're out on your own
You're all alone
You're out on your own
So go

It's been a while
Slow in arrival

You've seen it coming for us
Slo-mo as it approaches

Life all in piles
Wreckage for miles

You had the chance to
Change trajectories and stay put

There's no studying prepares a heart
For where you're going
There's no way the things you heard
Compare to how it feels
You're out on your own
You're all alone
You're out on your own
So go
