

You Create Yourself

Dirty Projectors

You create yourself
Fluid from fabric
True in your maverick soul
Hungry, full of health
Lifting, ecstatic
Laughing and beautiful

You are what you make yourself
You are what you make yourself

Better face the fact
Death is rendition
Once you have risen you're gone
Let us raise a glass
Long as we're living
Dance to the rhythmic song

Celebrate all night long
Celebrate all night long

We are what we make ourself
But we don't know what we know
You are what you make ourself
But we don't know

There is time enough
Time is the healer
Our fate is sealed never
So keep climbing up
Like the Endeavor
Among all heavenly spheres

You are what you make yourself
You are what you make yourself
We are what we make ourself
But we don't know what we know
We are what we make ourself
But we don't know
