

Weekend

Dirty Vegas

The weekend started
And no one tell you what to do
Don't be disheartened
'Cause I know that you'll come through
In your own time, in your way

We must be stupid
If we let this slip away
So let's get drunk
On our promiscuous ways, ways, ways
Ways, ways, ways, ways, ways

It's early morning
And all our friends have crashed and burned
TV tells me something
What do we never learn

In your own time, in your way
In your own time, with our own space

It's never going back, never going back
Never going back, never going back
It's never going back, never going back
Never going back, never going back

Place where I come from
Place where I come from
Place where I come from
Place where I come from
Place where I come from

'Cause we're never going back, never going back
I'm never going back, never going back
'Cause we're never going back, never going back
I'm never going back, never going back
Place where I come from

'Cause we're never going back, never going back
I'm never going back, never going back
'Cause we're never going back, never going back
I'm never going back, never going back
Place where I come from

Place where I come from
Place where I come from
Place where I come from
Place where I come from
