

Event Horizon

Discreation

We aspire to conquer eternity
To explore a dismal void
In the cold light of the stars
We seek the timeless mystery
With blasphemous technology
We transgress the borders of our universe

Chorus:

Event horizon
Journey through hell
Evil in his purest form
Born of human hatred
Event horizon
Journey through hell
Cold light of the dying suns
Sempiternal permadeath
Behind the veil of reality
Nameless horror awaits
Beyond scientific reality
We're on a sinister quest

With blasphemous technology
We transgress the borders of our universe

Chorus

Malevolent consciousness
That feasts on fear and hate
Malicious entity
Never to be tamed
Behind the veil of reality
Nameless horror awaits
Beyond scientific reality
We're on a sinister quest
We aspire to conquer eternity
To explore a dismal void
In the cold light of the stars
We seek the timeless mystery
With blasphemous technology
We transgress the borders of our universe
Chorus
