

Darker Light

Dispatch

Tire fires, power lines
Wild dogs, towering trucks
Black smoke, black cloud
I wonder what you saw

Tired eyes, flood of flies
Look around, burial ground
Dusk is here, disappear
We wonder what you saw

Did you see a crash of rhinos going by
Or a dazzle of zebras in their stripes
Did you race the dragons on your bike
I saw the lighter dark and the darker light
Did you see the colors in the fading rain
Did you see them burst into butterflies again
Did you see your sister standing on the waves
As you watched her roll out of sight
I saw the lighter dark and the darker light

Tire fires, power lines
Wild dogs, towering trucks
Black smoke, black cloud
I wonder what you saw

Tired eyes, full of fire
Stumbling round, burning ground
What you say, come this way
I wonder what you saw

Did you see a crash of rhinos going by
Or a dazzle of zebras in their stripes
Did you race the dragons on your bike
I saw the lighter dark and the darker light
Did you see the colors in the fading rain
Did you see them burst into butterflies again
Did you see your sister standing on the waves
As you watched her roll out of sight
I saw the lighter dark and the darker light

Did you see a crash of rhinos going by
Or a dazzle of zebras in their stripes
Did you race the dragons on your bike
I saw the lighter dark and the darker light
Did you see the colors in the fading rain
Did you see them burst into butterflies again
Did you see your sister standing on the waves
As you watched her roll out of sight
I saw the lighter dark and the darker light
