

## Follow I the River

Dispatch

Leaves are falling, soon we'll be able to see the river  
From this road we are traveling for the winter  
The land she takes us under her feathered wing

And fire light, go up and tell the night, that on my word

It's not far away now, things are gonna change now  
If we only have today then follow I the river  
Stay right on your shoulder I

We'll fade brighter and trust the water keeper  
Do you mind standing guard for the locust eaters  
For they have brought us this far, let the white face stone the  
ir own

And fire light, go up and tell the night, that on my word

It's not far away now, things are gonna change now  
If we only have today then follow I the river  
Stay right on your shoulder I

Sweet delight of mine, won't be long to we are gone  
The only way to go is towards the sun, my love, and give 'em wh  
at they want  
May they love before they fear and hope is not undone

And fire light, go up and tell the night, that on my word

It's not far away now, things are gonna change now  
If we only have today then follow I the river  
It's not far away now, things are gonna change now  
If we only have today then follow I the river  
Stay right on your shoulder I
