

# Cryogenesis

Distant

I'm drifting away  
My soul is dancing in this torturous slumber  
Connected with the worlds of pain  
The writhing roots are sinking into my flesh

The reminiscence of the past  
Puts me to sleep  
Cherish me now, in the arms of the Void  
Take me away

Let us descend now, into the blind world  
Ice-cold flames may light our path  
I feel nothing

I don't remember falling asleep  
But I don't seem to have woken up  
The cracks in my bones make a welcoming home  
For the rapacious, noxious rust

And in the silence sewing my eyelids shut  
If you're there, I can't feel you  
And in the silence life lost it's vibrance  
I'm not here anymore, anymore

The deafening silence surrounds me for eternity  
My omnipotence is harvesting the hate within  
For I grow stronger every moment of this offering  
The final ascension is upon me

The manifest of the immaculate tyranny  
Looming over the false havens  
The years of suffering  
Open the glass casket inside of me

Fractures of my shattered will  
For all the aeons I've been trying to chase  
Finally shape into one fitting piece

I don't remember falling asleep  
But the tops been spinning non-stop  
The cracks in my bones make a welcoming home  
For the rapacious, noxious rust

And in the silence, sewing my eyelids shut  
If you're there, I am not  
The silence, please no more silence  
I can't take anymore

Witness the bloodline that I define  
Scorching thy remnants in the endless abyss  
Your soul is burning in the ice-cold flames
