

# The Eternal Lament

Distant

The leprous breath slowly shivering down my spine  
My end is nigh  
Take me away

The time deconstructed  
Decaying husk drowning in solitude

My hands are rotting away  
The shed skin veiling the dirt  
Bitter pain drowning my bones

Lament of my soul gets louder  
Zabudnutý časom uzatváram kruh  
Moja rakva zatvára sa, obloha zčerná  
Trpká bolesť ozýva sa z mojich pľúc  
Svetlo hasne, hmla obklopuje ma  
Moja duša vzliká, všetky vrany tichnu  
Hrobové ticho upadá na moju korunu

Lead me now into the city of woe  
Before me there was nothing but a wasteland here  
Born from hate, a soothing agony, death resides inside my eyes  
My presence will last forever embedded in the ruins of this ver  
y land  
This is the eulogy of the fallen king

Whispered gifts are promised blades that shackle down our throa  
ts

Lost in the silence  
Pray for redemption

I am my own martyr  
Forgotten by time, closing the cycle

I spread through this kingdom in the painful wail

I am death
