Distant

Cast aside off the light  
Existence is a lie

We are just soulless vessels  
Waiting to be tortured in this everlasting torment  
I am your fucking end  
Cancerous entity we worship, we believe, we suffer, we worry, we pray to  
We are the representation of the torment, the disease and hostility  
While the fire's on, nothing there will bring justice  
We'll be your bitter end

I am unrelenting evil  
This world got the better of me  
We all strive to be perfect  
So I'll give you the perfect ending  
Hammer down the nails through your hands  
Upside down  
Hanging above the ground  
Black blood pours from your mouth  
Putrid mess  
Hanging upside down

We are just soulless vessels  
Waiting to be tortured in this everlasting torment  
I am your fucking end  
Cancerous entity we worship, we will see, we worry, we suffer, we believe, we pray to  
We are the representation of the torment, the disease and hostility  
While the fire's on, there will be no justice

Blood spills from your eyes as the demons awaken

Burn me up kill me  
Sever my entirety  
Break my bones as the weight of deaths on me  
Feed me this humanity  
This entire entity  
I will never be subdued to the pain that you have caused my family  
Darkest days of life and you're still a great insanity, this will be the fall of man and pillaging  
The debt is clear
