

I don't know but I know it
You better find out what your place is
Urban plight is in the city streets
Its infectious and its complacent

Idoless

Over expression and rationed, assimilated temptation
Integrity - integrate...integration
Molested accosted, detested
I'll wreck this coming down like the apocalypse

Idoless..syndication

I don't know but I know it
You better find out what your name is
Arrested, infested, its your collective
Coming off like you wrote the ten commandments

Idoless

I don't know but I know it
You better find out what your place is
Urban plight is in the city streets
Its infectious and you are complacent

Idoless

The idol is within you
Watch it come on through
The idol is within you
Watch it come on through
