

# No More

## Disturbed

Once again we hear them calling for war  
It doesn't matter what they're fighting for  
They light the match and watch the whole world burst into flame  
The story's always the same  
So tell me people are you ready to kill?  
Behold the propaganda, get your fill  
A distant enemy is threatening our freedom again  
How much would you like to spend?

Millions are falling in line  
And it's just a matter of time  
Endless destruction will ensure their pockets are lined  
For all time

No more defending the lies  
Behind the never ending war  
It's time to make them realize  
We will no longer be their whore

No more, no more  
No more, no more  
No more, no more

They don't care about the blood on their hands  
Look at the world and you will understand  
They count the money as the innocent continue to bleed  
They're always planting the seed  
So tell me people are you ready to die?  
Without believing in the reason why

They paint a picture and the whole damn world is deceived  
It's all that they ever need

Millions keep falling in line  
It's only a matter of time  
Sowing destruction will make sure their pockets are lined  
For all time

No more defending the lies  
Behind the never ending war  
It's time to make them realize  
We will no longer be their whore

No more defending the lies  
Behind the never ending war  
It's time to make them realize  
We will no longer be their whore

No it can't be disguised anymore  
How they smile as we pay for their war

No more defending the lies  
Behind the never ending war  
It's time to make them realize  
We will no longer be their whore

No more defending the lies

Behind the never ending war  
It's time to make them realize  
We will no longer be their whore

No more, no more  
No more, no more  
No more, no more
