

It's About Time

Divine

It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say
It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say

Oh I never had the nerve to approach you baby
'Cause I didn't think that you would ever look at me that way
I known you for so long I seen all your lovers come and go
I know exactly how to please you
But I'm afraid that you'll say no

It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say
It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say

You told me about the nights
That you spent with her down by the lake
I wanted to tell you stop
How much could my poor heart take
I started burning up inside, how I long so for you
Just to feel your sweet caresses
Is all I ever want to do

It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say
It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say

I don't know why
I couldn't tell you that I care for you
And now I cry tears of joy
As I let you know that it's about time
That it's about time

It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say
It's about time
It's about time that you start looking my way
And I even gave you my last dime
Even told you what to say
