

# One Heart Away

Dixie Chicks

Well you know how much you mean to me  
But when we talk about eternity  
And babe I know how much you really care  
Forever seems to be too much for you to bear

Put your faith in my heart  
Just a minute of your time  
And tell me you could be mine I'll pull you closer til  
I make you mine  
Our love is only one heart away  
If you really love me let's start today

You say that you've been burned by the flame  
And that you're never gonna try love again  
For you to think of me as more than just your friend  
When I look in your eyes I see your heart in mine  
But there's just one thing that I need to say

Just a minute of your time  
I'll pull you closer til I make you mine  
If you really love me let's start today  
I only know that mine really needs you

Our love is only one heart away  
We've been together long enough to know  
I don't know what your heart's been thinking  
We should just hold on I'll pull you closer til  
I make you mine

Just a minute of your time  
If you really love me let's start today  
Our love is only one heart away

Just a minute of your time  
If you really love me let's start today  
I'll pull you closer til I make you mine  
Our love is only one heart away
