

Be Incredible

Dizzee Rascal

It just takes one to change you life
And be incredible and be incredible
The time is now to make it right
And be incredible and be incredible

Count your blessings life is a lesson
No point in stressing sweating the small stuff is digressing

Make an impression
Give it the full thrust putting pressure
Just for the pleasure while in the present
Eyes on the prize

I'm just a peasant if I got P and no piece of mind I'm really just blind
What can I find
Stuck in rewind
Chucking and jiving I say I'm thriving I'm in my prime
If I decline

I just want privacy I'll be fine
And then maybe finally I'll recline
But I feel like that ain't my design
I come through the grind I come through the Grime
They tell me I'm dead I'm come through and shine like I'm divine must be a sign

I saw the light and I crossed the line
I saw the light they got left behind
This little light of mine is sublime
Should be a crime
What you define I just redefine
And I'm so refined
With these rhymes you'll find that our minds just might intertwine but
All in good time

I ain't making no promises
I just keep it real that's what honest is
And it's coming out of every orifice
I don't care about your petty politics
I ain't making no promises
I don't even need a hypothesis
Cause I know my pride is where the profit is
Look at me and say that's what a prophet is

It just takes one to change you life
And be incredible and be incredible
The time is now to make it right
And be incredible and be incredible

Faith and good conscience
Good manners and give compliments no response for the nonsense Or tolerance
I have trouble giving in to dominance
I ain't saying I'm above incompetence
I'm just confident
Yeh I dot my I's cross consonants
And I'm wide eyed plus I'm trying cover all the continents
It's big world that's a big course wanna drip sauce but it's all false
Trying to navigate like a fit jockey on shit horse
I'm just trying to stay above the pitfalls
Everything I got I had to work I had to kick doors
Had to level up and then I skip floors you better get yours

Even when you get it can go wrong
When your mothers sick trying to stay strong you can't even pay to make the
pain gone
All the medication is strain on her
She just saying that I gotta pray for her
Plus I got a baby on the way I can not complain gotta pick a name gotta buil
d a lane for her 1
That's the aim for her

I ain't making no promises
I just keep it real that's what honest is
And it's coming out of every orifice
I don't care about your petty politics
I ain't making no promises
I don't even need a hypothesis
Cause I know my pride is where the profit is
Look at me and say that's what a prophet is

It just takes one to change you life
And be incredible and be incredible
The time is now to make it right
And be incredible and be incredible

It just takes one to change you life
And be incredible and be incredible
The time is now to make it right
And be incredible and be incredible
