

# Flatline

Dizzy Wright

We embarking on a dangerous experiment  
Feeling unbalanced, something done happening  
After death is a mystery and I'm curious  
Up for the challenge, wanted to know what happened  
Psychologically active  
I got too many questions  
Don't let me die and if there is a hell or heaven  
I just wanna know how in the hell we all get so connected  
All I need is five minutes, maybe seven just to flatline  
I'll be back before you even know it  
I know where I'm at but don't know where I'm going  
I just need a moment  
I just need you to believe in me  
Some lines shouldn't be crossed but I guess we'll see  
Came back to life but my sins came with me  
Lost my mind and my soul, I never felt this empty  
Saw the other side, now the universe working against me  
Soon as my heart stop my demons came up to get me  
At first I was just enjoying the gifts  
The longer we go, the more we at risk  
Now I'm seeing things that don't exist  
Seeking answers done got me in some shhhhhh  
(Hey you heard that, you heard that?)  
Yeah I heard it too  
Or maybe I'm just hearing things  
Why do I feel insane?  
Why do I feel like I done triggered something in my brain?  
(Why do I feel like I done triggered something in my brain?)  
  
Maybe we took it too far  
Y'all would not believe what we saw  
Maybe we didn't opened up the wrong doors  
Maybe this is my fault  
Maybe we could get a fresh start  
I would like you to stop my heart  
Maybe we could open up the right doors  
Maybe that's going too far  
  
But I just wanna flatline  
I just wanna flatline  
(I feel like) maybe this is all my fault  
But I just wanna flatline  
I just wanna flatline  
(I feel like) maybe we going too far  
  
Too long, flatline  
Pure energy, what if I die tomorrow  
My shoes on  
I thought about that last time  
Now I'm feeling like I'm followed  
I don't do excuses  
Experimenting with these medical students  
I know it sound crazy and you never would do it  
You wanna learn about it man I hope you don't be foolish  
Might just hit me with the electric shock  
Extra high, is this life after death or not?  
I really thought that this would put me in a better spot

I'm hearing voices that'll never stop  
Maybe we didn't open up the wrong doors  
Trying to open up the right ones, I just might run  
I can't handle all of this, what am I on?  
Let bigons be bigons  
This what I spend my time on, but

Maybe we took it too far  
Y'all would not believe what we saw  
Maybe we didn't opened up the wrong doors  
Maybe this is my fault  
Maybe we could get a fresh start  
I would like you to stop my heart  
Maybe we could open up the right doors  
Maybe that's going too far

But I just wanna flatline  
I just wanna flatline  
(I feel like) maybe this is all my fault  
But I just wanna flatline  
I just wanna flatline  
(I feel like) maybe we going too...
