

I Can't Quit

Dizzy Wright

Yo (DJ Hoppa)

Oh man

You know I had to pop up at the new broken complex spot
Know I had some things on my heart, on my mind I want to talk about
Uh-uh, go ahead and roll that up

Leaving my footprints on the surface
Engrave my granny name in the ground and I'm still hurting
Grandpa I miss you too, since you been gone I been searching
Soul set on fire but I never became a burden
I just try to remain a king but everything feel extreme
Now they saying science can give us a a quicker vaccine
It's crazy 'cause this pandemic just feel like a bad dream
We on a real mission
Can't prove all the effects, that's another tricky condition
If it's pre-existed, then this knowledge is more conflicting
In a short amount of time look at the problems [?]
If you gon' let me speak my mind then I gotta be specific
We don't know what normal look like anymore with social distance
It's all moving fast
[?] your immune system, that's better than a mask
Pharmaceutical companies can humbly kiss my ass
I can't be no test dummy so I'll probably pass
But I appreciate the bravery, I can channel that
Yeah, I can channel that

Big dreams on my mind all the time but they all don't fit
Taking long range shots from the top and I hope you don't miss
My momma told me "Can't be walking around like it don't exist"
Sometimes life make me wanna give up but I know I can't quit

Take a look into my eyes, broken mirrors
You might look at me surprised, then I admit it
Rock my flaws like my style til I'm fitted
Cut that [?] did it
Ate the apple til it's raw man, I done bit it
Got me asking if my God can forgive it
Til that time kicking rocks with these blisters
Write about it like it's scripture, yeah
Mad clever with my [?] til they get get me bigger
People want my pen like [?] I'm Tommy Lister
Life a crazy girlfriend but F it, I can't quit her
I done been around the [?] dirt but I ain't litter
Gone to November like I'm Wyclef Jean, Lauryn Hill
Trying to find my way home, stop signs every scripture
God planted bones and these bones [?]
Whatever you be on, be your own til you bleed realer

Big dreams on my mind all the time but they all don't fit
Taking long range shots from the top and I hope you don't miss
My momma told me "Can't be walking around like it don't exist"
Sometimes life make me wanna give up but I know I can't quit
Big dreams on my mind all the time but they all don't fit
Taking long range shots from the top and I hope you don't miss
My momma told me "Can't be walking around like it don't exist"
Sometimes life make me wanna give up but I know I can't quit
