

Strictly Business

Dizzy Wright

I came so far wit this shit don't got room to make mistakes
Traveling the states thinking bout my unrealistic traits
They drop like flies when they realize it ain't no pushing breaks
No more energy is given to the ones that can't relate

The fruit can't even be eaten the seeds got plant today
Embodying where I'm at but this not where I plan to stay
They like to doubt the boy I'ma make regret them bets against me
Them checks didn't come in quickly nobody meeting me 50 50
Business strictly
They think they know me but they don't get me
I ain't yo acceptable nigga y'all better stop fucking wit me
Only around to rally behind the kid they use to know
Came to the conclusion the confusion is being usable
Being reachable being teachable you know the usual
Stuck in this cubical watching robots play human roles
I wish this sounded more delusional
This new reality got me asking god what you use me for

I came so far wit this shit don't got room to make mistakes
Traveling the states thinking bout my unrealistic traits
They drop like flies when they realize it ain't no pushing breaks
No more energy is given to the ones that can't relate

I can't be manage you let them tell it boy I'm something else
Opportunities don't go no where they go someone else
I think it's almost full you think it's almost nothing left
When it's strictly business its tricky being your humble self
When the quarterback hand off that ball how you think them fumbles feel
Eventually it's like fuck it let me show off the passing skills
Switching my technique the defense think I'm too readable
I use to like some of these rappers now they not believable
Can I really thrive this way is it achievable
Not gone receive the message if it's not for someone like me to grow
Trial and error but I done been through real terror
I done seen life at its lowest but you can't tell me it don't get better
You don't hard this shit is when you ain't have parents that prepared ya
Never let the pressure break me
You can doubt I dare ya
It's rare to see this this type of unity come from my era
One day somebody gotta believe that we stronger together
