

Firelight

DJ Antoine

We are young and alive
The moment has arrived
To rise up and get out
Before the stars go down
We can go on and on tonight
You know it's gonna be alright
Step into the firelight
And everything will be alright

You can't stop, stop, stop
The fire, fire, fire, firelight
You can't stop, stop, stop
The fire, fire, stop the firelight

We can go on and on tonight
You know it's gonna be alright
Step into the firelight
And everything will be alright
We gotta turn the love around
Before the stars go down
So ignite your other side
And step into the firelight

You can't stop, stop, stop
The fire, fire, fire, firelight
You can't stop, stop, stop
The fire, fire, stop the firelight

Here's a brand new start
Leave the world behind
Open up your heart
Clear it out of your mind
We can go on and on tonight
You know it's gonna be alright
Step into the firelight
And everything will be alright

You can't stop, stop, stop
The fire, fire, fire, firelight
You can't stop, stop, stop
The fire, fire, stop the firelight

We can go on and on tonight
You know it's gonna be alright
Step into the firelight
And everything will be alright
We gotta turn the love around
Before the stars go down
So ignite your other side
And step into the firelight

You can't stop, stop, stop
The fire, fire, fire, firelight
You can't stop, stop, stop
The fire, fire, stop the firelight
