

# Fireflies

DJ Bobo

We can fly so high and see the light shining  
In the darkest sky, we paint silver linings  
Color up your hearts  
'Cause that's the part where it all starts

We keep pushing on  
The chances we're taking  
And growing strong  
Through decisions we're making  
If we're falling down  
We get back up where we belong

And if the world turns upside down  
We know there's always hope around  
Behind the clouds, the sun will always shine

Like a million fireflies  
We can light the darkest skies  
We can sail on oceans made of fire, oh  
We can keep our dreams alive  
And we let the love survive  
United, we can rise like fireflies, oh

Oh  
We believe in life and write our own story  
If love survives, we reach all the glory  
For tomorrow's day  
(For tomorrow) We need to push the clouds away  
(Push the clouds away)

If we keep on up  
And never stop trying  
Build a better world  
To save truth from dying  
With a simple spark  
We send a message through the dark

And if the world turns upside down  
We know there's always hope around  
Behind the clouds, the sun will always shine

Like a million fireflies  
We can light the darkest skies  
We can sail on oceans made of fire, oh  
We can keep our dreams alive  
And we let the love survive  
United, we can rise like fireflies, oh  
Oh

We're fireflies, oh  
We can keep our dreams alive  
And we let the love survive  
United, we can rise like fireflies, oh
