Just see what she can do with a motherfucking selfie stick
We had all kind of angles two views
Ipad on the dresser and a phone in the hand

If we let that leak, but she gon' blame me
Now we showing off for the camera, she screaming harder
I beat it from the back while she looking for her charger
I can't let it die I had to get this
I had to put it on panorama then take a flick
We don't need no filters keep it basic
He body is the canvas and I paint it
If that shit come out we know we made it
