

Free from Gravity

Django Django

I been looking for some water
But there's nothing in the well
Pick yourself from the gutter
No one even knew you fell
Everything they ever taught us
Told us later it was wrong
Wasn't even worth the trouble
Think we knew it all along

Can't understand, I wanna know
What's your philosophy?
I'm tripping up, but I'm doing
The best that I can

We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity

Floating up, we're getting higher
Spinning closer to the sun
Watch us rise from the fire
Say it's only just begun
See the world get madder
As we're lifting off the ground
So we're pulling up the ladder
'Cause we're never coming down

Can't understand, I wanna know
What's your philosophy?
I'm tripping up, but I'm doing
The best that I can

We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
We're free from gravity
