

Sunken Dream

Django Django

Drifting to the spring
It's got us [?]
Take a look down deep below
Let your mind forget what you know

See where the sun light is
That's the place where we begin
Let your head drift slowly down
And look like further into the ground

[Chorus:]

See
Are you feeling the feel
'Cause we
All the wait and here now
We're surrounded in color
So don't even shutter
I won't let you see harm,
I promise
Take from the world within
This sunken dream

As we descend
Beneath the earth
The air is still
Transforms our all around
Have you ever heard
Such a wondrous sound
As the darkness grows
Phosphorescence [?]
Reveals a hidden maze
And shuts a right upon your face

[Chorus]

We're surrounded in color
So don't even shutter
I won't let you see harm,
I promise
Take from the world within
This sunken dream
