

# Trees On Fire

DJDS

Trees on fire, flame went higher  
And I don't ever want it to change  
Trees on fire, flame went higher  
And I don't ever want it to stay the same  
Night on fire, new desire  
And I don't ever want it to change  
Trees on fire, flame went higher  
And I don't ever want it to stay the same

Hard time go by, don't it [x3]  
You see me and I know you know it  
Hard time go by, don't it [x3]  
You see me and I know you know  
You see me and I know, know  
You see me and I know, know

Trees on fire, flame went higher  
And I don't ever want it to change  
Trees on fire, flame went higher  
And I don't ever want it to stay the same  
Night on fire, new desire  
And I don't ever want it to change  
Trees on fire, flame went higher  
And I don't ever want it to stay the same

I've been flying in, you've been flying out lately  
(I've been flying in, you've been flying out)  
Couple late nights, couple flights daily  
(Couple late nights, couple flights)  
If it don't hurt, it don't count baby  
For you I burn it down, baby  
Burn the whole town, maybe  
(You see me and I know)  
Couple cars, big yard + a house maybe  
(Couple cars, big yard + a house maybe)  
You tried so hard to put it out, baby  
(You tried so hard to put it out, baby)  
I'm praying that you stay daily,  
But you want it your way baby  
Burn it all down, maybe  
(You see me and I know, know)

Hard time go by, don't it [x3]  
You see me and I know you know it  
Hard time go by, don't it [x3]  
You see me and I know

Trees on fire, flame went higher  
And I don't ever want it to change  
Night on fire, new desire  
And I don't ever want it to stay the same  
Trees on fire, flame went higher  
And I don't ever want it to change  
Trees on fire, flame went higher  
And I don't ever want it to stay the same  
Night on fire, new desire  
And I don't ever want it to change

Trees on fire, flame went higher  
And I don't ever want it to stay the same

And I don't ever [x2]  
Flame went higher [x2]  
And I don't ever  
Flame went higher [x2]
