

Half Life

Djo

I fight the urge to search my name
There's a better me, I swear
But curiosity

I see
I let my ego get the best of me
In the age of excess
Less may be best for me

God it makes me sad
We're the last to know
The world is changing
And upgrading
Faster than we can control

Sick of living in the old days?
Mind burdened by the old ways?
Keep trying to forget about it?
Watch a video, don't fret about it (No)
You don't need it, why you want it? (Want it)
I don't see you moving on kid (On kid)
I don't see you moving on kid
No, I don't see you moving on

Now I see
I let these people dig their hooks in me
And I consider myself a fool
Plugged in
Half life

God, you're a fool
You think these people really care for you?
You really think they will be there for you?
Plugged in
That's a half life

I know you
I love you
I want you
I need you
You complete me (You complete me)
I adore you (I adore you)
I adore you (I adore you)
I adore you (I adore you)
I adore you
I adore you
