

# Break Me

DMA's

Hole in our waist we take a breath again  
To work it out  
It's all in my head, a friend again  
Always, please let me out

I've been there before, I've seen it once more  
Would I see you are going, see you are  
Would you break me? Would you break me now?  
You won't break us, you won't break us now

Sole state of mind, the state of mine  
Always, I won't let you down  
It's all in our days to find a way  
And say I'll have you 'round

I've been there before, I've seen it once more  
Would I see you are going, see you are  
Would you break me? Would you break me now?  
You won't break us, you won't break us now

Would you break me? Would you break me now?  
You won't break us, you won't break us now

Please break all to the underground  
Please break all to the underground  
Please break all to the underground  
Please break all to the underground
