

Gypsy

Dokken

The gypsy told me as we looked into the flames
And then she showed me as she looked above my face
She told me stories as we sat under the stars
And then she waved her hands and I was in her arms

In her arms

Gypsy, won't you tell me what you know?
You know I've lost my way, got no place to go
Gypsy, won't you tell me what you know?
You know I've lost my way, got no place to go

Queen looked up to the stars and counted one by one
And then the moment came and there was only one
You know I had to go before the heat of day
She waved her hands above and I was on my way

On my way

Gypsy, won't you tell me what you know?
You know I've lost my way, got no place to go
Gypsy, won't you tell me what you know?
You know I've lost my way, got no place to go

Raise yourselves
Search for your horizon
Before the darkness comes

Gypsy, won't you tell me what you know?
You know I've lost my way, got no place to go
Gypsy, won't you tell me what you know?
You know I've lost my way, got no place to go
