

Nobody But You

Dolly Parton

When the night gets dark and I'm alone
I want to know I've got a love of my own
Who comes through with a love that's true
No, nobody but you

When my lips are burning with desire
Only your kisses can put out the fire
Who comes through with a love that's true
No, nobody but you

No, nobody but you my love
No, nobody but you
Can't love me just like
I know somebody should do

When the world gets so dark and gray
Seems like the blues are gonna carry it away
Who comes through with a love that's true
No, nobody but you

No, nobody but you my love
No, nobody but you
Can't love me just like
I know somebody should do

When the world gets so dark and gray
Seems like the blues are gonna carry it away
Who comes through with a love that's true
No, nobody but you, no, nobody but you
No, nobody but you, no, nobody but you
