Epilogue

Dominic Fike

Oh, whatever
I was thinking
Before you said what you did
Fell out the back of my head
Oh, whatever
I was thinking
Before you said what you did
Fell out the back of my head

Oh, what—
You probably forgot about it
'Bout it
So what
So what

Here's how our universe goes
All that you say I don't mind
Where in the world does that leave me?
Behind
And here's how our universe goes
All that you say I'd obey
Where in the world did they lead you?
Astray

Bleeding out the back of the Bentley, it appears
I only learn when I crash and burn
When I crash, I take the whole cast of characters
Massive error creates work for therapists
Bleeding out the back of the Bentley
Still move forward
Fucking up my family relations
Still move forward
Piling up my fears in a medley
Still move forward
Shifting through different variations
Still move forward

I traveled through time with thoughts and verses
Thought I moved forward but it just goes in circles
What you said back then
Fell out the back of my head

Oh, whatever
Oh, whatever
Oh, whatever
Oh, whatever

Oh, whatever
I was thinking
Before you said what you did
Fell out the back of my head
Oh, whatever
I was thinking
Before you said what you did
Fell out the back of my head
