

# Falling Asleep

Dominic Fike

She said, "I dressed in your fave—"

Say what you need so you can get what you want (Get what you want)

Because it really doesn't matter

If you think nobody's watching you would do it too

'Cause you're just like us

Don't you play the role and disappoint all of the people who adore you

Or you can run away from here right now and take me with you

They want a way to love for you, 'cause

They don't know anything about you

I think I know what you mean but watch what you say

'Cause they'll be tryin' to knock you down in some way

I keep a couple of feet between everybody and me

You like to take 'em away and attempt to ruin my day

And it feels like gold (Feels like love)

And it seems like faith (Seems like)

But we won't know (We won't)

You're away

You can say what you need so you can get what you want

Because it really doesn't matter

If you think nobody's watching you would do it too

'Cause you're just like us

Don't you play the role and disappoint all of the people who adore you

Or you can run away from here right now and take me with you

They want a way to love for you 'cause

They don't know anything about you
