

Skeletons

Domo Genesis

Define good sounding sound and bad sounding sound

All the skeletons in my closet piling (Yeah, yeah)
Couple sequences balanced, look at all fo the mounting
I swear it's all in the features, I went so hard it callused
I fought with all that I had left, another foot forward, hard to call
that a bad step
Heavy-handed hardy on the lead when the gas press
Hardly out of heaven, God in hell at my last breath
My best regards, the weapons drawn at me, no stress involved
Annoying f'ers mean the bets is off
The Smith & Wesson blow the extras off
Them little blessings ain't impressing Gods (Not at all)
Splitting bread and double edging swords
I'm on my bully 'push-and-pull', it didn't get me fully
Tiger blood and got the cauldron fire swishing through me
I'm choosing violence over silence, try and listen to me (Yeah)
I strike to kill, how I'm designed is just the mission to me (Yeah)
If you want in then pay admission to me
Uh, pay attention to me

Aight

These foolish niggas had me cracking though
Thought they had me figured out
Fuck niggas be talking about though, yo
Uh

Tough battle for the best soldier
I'm guessing this is what it took to expose em, I admit I'm not the best knowing
Caving in, I felt my chest close in
I mad a mess and these the consequences
Evidently I am not senseless, uh, every verse is me venting
And every curse is truly worth lifting
When I'm immersed in what I heard, listening
The world circling, I serve wisdom, my young niggas only know mischief
The last life I lived was lonely and I know them feelings
Frozen when he shown his image
Another void within his soul, he chose to fill it with women
I'm not with the extras, spirit in me present
Head-wraps and Nefertiti pendants
Black people holding deep resentments
Too much for me to even mention
Human nature, we too egocentric, it's like the world against us
On as my Odicea necklace, I've been keen on getting even brethren
I can't believe you chose to bleed out underneath the crescent
The biggest heart I ever knew, I bet its bruised
Applying pressure where it's credit due
Peeped the specs and caught the centre view
In which direction are you stepping to?
