

Metalface

Don Broco

Face complete with metal plate screwed into your jaw
Hangover that won't pass with time
Paralytic was your mission of the night
Can't seem to figure it out
That you still go for it as big as you did before
You ended up in a hospital
Ended lucky, could have ended much poorer

Can't make it home, what if you just don't change?
Lost your wallet and phone and you just don't remember

Forget everything you've learnt and drink like it's new
Forget everything you've learnt and you tear yourself apart

Rate you'll be ok to survive a second kicking to your brain?
Doesn't matter, you try to figure it out
You try to piece bit by bit where it went wrong
I'll try to piece why you still go for it as big as you did before

Forget everything there's nothing I can do that can stop what you are
Forget everything there's nothing I can do but sit and watch

Try and talk you sense, get inside your head, not working
Keep you in the house, hardly let you out, it's not working
Can't figure it out, I'll never figure it out
