

Back to Us

Don Diablo

It's been a while since you've opened up like this
And you've been quiet and I barely know these things
I always told you, you could tell me what you think
If you had a problem, how was I supposed to know?

Anything, everything that you want
These are all little things I can solve
Pull you back so we don't drift away
Everything, anything that you need
Listen to every word that you speak
All I ask is that you don't rip on me

I'll fix this love (I'll fix this love)
So we back up (so we back up)
To what it was (to what it was)
We do it together so we can get back to us

To us, to us
So we can get back to us
To us, to us
So we can get back to us
To us, to us
So we can get back to us
To us, to us
So we can get back to us

No one's perfect, doesn't matter who's at fault
I don't wanna waste more time 'cause I'm so sure
We can spend hours thinking on what we did wrong
I rather focus on why we fell in love

Anything, everything that you want
These are all little things I can solve
Pull you back so we don't drift away
Everything, anything that you need
Listen to every word that you speak
All I ask is that you don't rip on me

I'll fix this love (I'll fix this love)
So we back up (so we back up)
To what it was (to what it was)
We do it together so we can get back to us

To us, to us
So we can get back to us
To us, to us
So we can get back to us
To us, to us
So we can get back to us
To us, to us
So we can get back to us
