

Cause And Effect

Don Francisco

The old man shook his head and said
Now, just a minute son
Are you sayin' that this risin' from the dead
Is really done?

Now I'm all for love and peace
But you just pushed this thing too far
I've been around enough to know
It's not the way things are

It defies the laws of nature
It confounds the mind of man
It draws everything I know
Up in the air

If your Jesus really conquered death
Well, I'm not sure where I'd stand
Does it mean there is a God who really cares?
And for all these years I've lived like He's not there

I said, our Father's love for us
Is so great that He shed
The priceless blood of His eternal Son
The power of our Creator raised Christ Jesus from the dead

The evidence is there to inspect
It's just supernatural cause and effect

The old man shot a glance
Like somethin' long asleep was stirred
He stared into the sunset
Long before he said a word

Could it be that I have made my heart so hard
My eyes can't see?
The simple truth before me
Is that God just may love me

It defies the laws of nature
It confounds the mind of man
It drew all I thought I knew
Up in the air

But if Jesus really conquered death
I know where I want to stand
It means there is a God who really cares
And I'd give Him all I am if He was there

I said, our Father's love for us
Is so great that He shed
The priceless blood of His eternal son
The power of our Creator raised Christ Jesus from the dead

The evidence is there to inspect
It's just supernatural cause and effect
It's just supernatural cause and effect
