

From a Beautiful Star

Don McLean

Looking down from a beautiful star
On a world that's drifting too far
Away from believing in love

And from here I can see for so far
And for me I'll still cling to my star
Untouched and believing in love

When you're up so high
It's foolish to deny
You might fall a long, long way
But I believe in love
So far above the earth I'll stay

This height is subtle and no space shuttle
Can take me down from this lovely place
When I'm with you it's another time in space

This height is subtle and no space shuttle
Can take me down from this lovely place
When I'm with you it's another time in space

Looking up at a beautiful sky
With the cloud and the earth blowing by above
And believing in love
