

Just how far does the universe go
does it ever end, You say you want to know
Just how high can you count?
before the numbers all run out

who built the pyramids?
do aliens exist?
where does god come from?
one more phenomenon...

But if you know how strong my love
and your heart and mine can comprehend
just how long I'm gonna feel like this
then you'll know what infinity is
then you'll know...

They say time goes on and on
Even after we're all gone
there's a black hole up in space
that even light can't escape

who built the pyramids?
do aliens exist
where does god come from?
one more phenomenon

But if you know how strong my love
and your heart and mine can comprehend
just how long I'm gonna feel like this
then you'll know what infinity is
then you'll know...

They'll find some answers
to all those mysteries
but they won't understand
what's between you and me

who built the pyramids?
do aliens exist?
where does god come from?
one more phenomenon

If you know how strong my love
and your heart and mine can comprehend
just how long I'm gonna feel like this
then you'll know what infinity is
then you'll know...

Then you'll know what love is
