

Street Lady

Donald Byrd

Hey Woman
Liberated Lady of today
Remember all our childhood days
Boy and girl we used to play

Free now
Emancipation is what you've found
Legislation put me down
What happened to yesterday?

Woman of the world
Now that your eyes meet mine

You're where you want to be

You've come along way baby

Hey woman
Chauvinism's day is done
Now there isn't anyone
For you to look up to

Hey lady
If independence is your thing
You've got the world on a string
Go out and take your turn

Woman of the world
Where would you prefer me now
After all we've done together?
You want to pull away now

You've come a long way baby
