

There's a moon that commands my attention
It's so high in the sky, how I'd like to acknowledge you there
And you've got that similar sense of attraction
Just imagine the 3 of us in the air

It's alright here, for a while here, long as you're near me
Close my eyes here, imagine I'm not here, long as you're near m
e

Let's go, let's go to infinity
I'll be your remedy, if you'll be mine
Let's go, let's go to infinity
Don't worry bout a thang, just you and I

Wanna be caught up in a love so deep, I can barely eat, sleep,
or breathe
Cuz you've got a whole on me
Won't you travel with me to a place with no gravity
Just you and me

No inhibitions, no pressure, baby I got you
Your disposition, your energy say you want to
Come take a minute to let it go and hold onto me

It's alright here, for a while here, long as you're near me
Close my eyes here, imagine I'm not here, long as you're near m
e

Let's go, let's go to infinity
I'll be your remedy, if you'll be mine
Let's go, let's go to infinity
Don't worry bout a thang, just you and I
Just you and I, yeah
