

# I Wanna Luv You

Donell Jones

I want to love you  
Every night, every day  
You know I need you in my life  
Won't you stay  
I want to love you  
Every night, every day  
You know I need you in my life  
Won't you stay

You are the reason why I live  
A new found joy I can't contain  
Found myself thinking about your love  
Its a feelings I get, only my heart can explain

I've never felt so deep in love  
I think its because you touched a special part of me, baby  
Hope I'm the one you're thinking of  
You must be feeling the same as I do  
Can't see being in love without you

Girl I think about you everyday  
Hoping you will never go away  
Its so special when we all can share  
Someone who gives us tender loving care

Girl, I think about you every night  
Sharing dinner and a candlelight  
Saying I love you and hoping we  
We'll be together for eternity
