

# Love Me With The Light On

Donnie Iris

Babe, I know you're alone  
Dancing on your bed  
You know your old man is flying  
From LA to Long Island  
So dance for me instead

And though you're dancing in the darkness  
I know you dig it 'cause I'm watching

Even though you only touch me with the drapes drawn  
Even though you never kiss me with your guard down  
Even though you never love me with the light on me

The neighbors would not understand  
The neighbors could not understand

Babe, I know you're on fire  
You're burning with desire  
You know my old heart is aching  
This old ladder's shaking  
I can't wait to come up for love

Too bad your man, he doesn't kiss you  
And when you leave, he's gonna miss you

Even though you only touch me with the drapes drawn  
Even though you never kiss me with your guard down  
Even though you never love me with the light on me

The children would not understand

Darling, I miss you badly  
You know I love you madly  
There's got to be a better way

Rip off the shades and curtains  
Show the world that we're certain  
It's time we greet the light of day
