

# I Discovered You, You Discovered Me

Donny Osmond

Love, like grains of sand  
We let slip right  
Through our hands  
All the silly games that we play  
All the mistakes we  
Thought we'd never make  
It took us almost leaving  
To make us both start believing  
Just how much we mean to each other  
For you and me  
There could be no other

When I discovered you  
You discovered me  
And the love that grew  
Between us, a great discovery  
So glad that I discovered you  
You discovered me  
And the love that grew  
Between us, what a discovery

Let's make this love last  
Forget the heartaches  
That have passed  
Together we are safe and sound  
And the love we lost  
But now have found  
Let's learn from our mistakes  
Let's be more gentle than before  
Through love  
And through understanding  
Life means so, so much more

I'm so glad that I discovered you  
You discovered me  
And the love that grew  
Between us, a great discovery  
So glad that I discovered you  
You discovered me  
And the love that grew  
Between us, what a discovery

I discovered you  
You discovered me  
And the love that grew between us  
What a discovery
