

Make It Last Forever

Donny Osmond

There's so many things I meant to say
Mistakes I know I've made along the way
Times I know your heart was taken for granted
But it always seems to lead me back to you

Meant to turn the hurt around
I'd be a fool to lose the love I've found
Starting here and now
I'm gonna make it up somehow

I wanna make it last forever
And always keep this love together
I wanna make it last forever
And hold you in my arms forever more

I know it's hard sometimes to talk to me
The words don't always come so easily
But starting here and now
There's one thing for certain
Oh you know I'll make it up to you somehow
If you'll only know that

I wanna make it last forever
And always keep this love together
I wanna make it last forever
And hold you in my arms forever more

More than I could ever show it
More than you would ever know it
I'm gonna give back everything
For all you give to me
Just as sure as you were always there to love me
Constant as the stars above me
No one's gonna love you like I do

Stronger than before
I'm gonna love you even more
I wanna make it last forever
And always keep this love together
I wanna make it last forever
And hold you in my arms forever more
