

## The Slow Ascent

Doom:vs

In the void, Earth's asleep  
The sickness grows  
Embraced by it's tainted wings  
We still bleed

Cold oblivious  
Dying star

Drown my tears  
With your life  
Let me rise  
Let me sleep  
In your arms  
One more night

Paint like rust, covers me  
Like the blood  
Deep.. deep within her  
Mourning womb  
...only night

Into the dark  
Thru sullen lights  
I remember...

Torn apart...  
From the violent beating  
Of a heartless winter  
I long to rise...to feel

Cold oblivious  
Dying sun

Drown my tears  
With your life  
Let me rise  
In your arms  
I'll let go of this endless night

Now that you're gone  
Winter's come  
Please let me rise  
Please let me feel
