

# Mothership

Dope D.O.D.

Jay: I came back / for payback / landed in my  
spacecraft / niggaz ask who the f\*\*k I be /  
the god who made rap / I go way back / I'm the one  
abduct your kids outta your residence  
/ I'm the one who told George Bush that he could be a  
President / I'm the evidence / for  
intelligent / life forms / yours never been / no matter  
what you say irrelevant / I don't f\*\*k  
with lower specimens / created in my image but your  
lyrics more like shitty gimmicks /  
no deliverance / I pull the plugg and burn your whole  
village / I came back anonymous  
/ my real name is Xenu / my mission kill all the  
scientologists / I'm honourless / and  
masonry I'm high in it / plus the fact my spacecraft is  
build by the best german scientist  
/ let me cut ya / let me rupture / blow your mind like  
bolts of thunder / all the ladies say  
I love ya / we the lords of up and under / the species  
eat lychees / turn people into pc's /  
and bleed peeps like kishi's / more evil / believe me.

Skits: Piercing the ozon, we're too far to phone home /  
we grow clones and sip broken  
bones from snowcones / go head and throw stones...you  
know that wont postpone / the  
moment ya dome blows in half when I hit the target / I  
be the artist from another planet /  
with unidentified language, technoligy and  
mattechnoligy and mathmatics / Tidal wave  
surfer, carving tribal lyrics /I spray painted my UFO  
with hyroglyphics .

Dope: Update intelligence ya need to get with it / Pay  
visits stay wicked you'll be  
saying aliens did it / Ancient astronaut with fire  
power that will blow your planet  
up / Now all that's left is just some shattered rocks /  
Out of place artifacts people  
need to face the facts / Higher beings are the ones  
that gave us that / Who built the  
pyramids they came from the Mothership / Let non  
believer's think that we don't exist.

Skits: Cause we on some other shit, roaming through ya  
crib / protected by  
the goverment, we probe you in our ship / (we) cover  
every continent, they put us  
on their pedistole / we're burning up fossil fuels,  
stealing precious jewels / we far ahead  
of you, you dont know what the answer iz / when I tell  
you amatures my cannabis  
iz amethist / you wanna have eternal life ya gotta  
cross the bridge... / mummified  
we rock mics in our sarcophagus...

Dope: We ain't switching sides no matter what the offer

is / We opposites listen to the  
message that we transmit / Who can make the sun eclipse  
Stephen hawking knows of  
it / Ufo's black holes stars and the unknown / The  
milky way is our home yours is a  
danger zone / Yes were always watching so ya never  
alone / If we come down to land  
than your problems will grow / Watch armageddon unfold  
from the front row.
