I never run unless I wanna be ahead of some I'm passin' everyone so fast I surpassed the peloton Walkin' on the sweaty sun That's why I carry heavy lungs Turned 21 I came to Earth with a set of guns And lightsabers Cut the light of the myspacers And light cases with cocaine it's like Vegas But I came to your planet as a lifesaver And to harvest the organs of my white neighbor My main objective Leave a man slain his intestines Sprayin' for more than 7 seconds Displayin' the ways of perfection I daze em like toxoplasmosis infection Today it is Cosmosis Jones's inception I pray to the godz for the sword of deception The things you will see neither fact nor it's fiction My life non existent Yet livin' I'm singing Twinkle, twinkle, we're from Mars! Wistle, wistle kiss the stars! Twinkle, twinkle, we're from Mars! We are way to far for people... The cyborgs are ready to come with the deadly Weapons we carry and slaughter (Watch out!) We drive through you hood, find your leader and crew And leave' em all dead on the corner (Shot down!) With my rhymes I travel thru time Slime makes my white exoskeleton shine And ya betta think twice about stabbin' me up It gets hot, when ya got acid for blood! (Braaa!) I'm Judge Dredd with the shotgun led Time for some pump action drop ya'll dead Rocket packet on my back As I take off Who dares to face off with Vicious? (No one!) On a pitch black planet I am prisoner Riddick When we in the house it's a crib full a critters District 9's where I kick it with Wikkes Got my prawn finger on the trigger, bring it!... Twinkle, twinkle, we're from Mars! Wistle, wistle kiss the stars! Twinkle, twinkle, we're from Mars! We are way to far for people... Watch me illuminate the sky with a laser beam I'm beamed up I remain unseen Predator cloak on ya stronghold gets rolled on Enforcements their all gone you ain't winning this one Melt down armor with my plasma gun Now ya hole puny army's gonna get out done So come to the darkside there is nowhere to run Enjoy the last time that you can see the sun You're all enslaved in my dark empire Force fields no need for barbed wire

I never transpire got what's required

And ya whole planet I'ma set it on fire
Escape with the spaceship like a stunt flyer
Ya can't imagine we take it much higher
No opposition at all ya not fighters
Join the empire the future brighter
