

Sailor's Delight

Dope Lemon

Gon' take your hand and put it in mine, baby
Gon' take your hand and put it in mine, baby
Gon take your love and put it with mine, baby
Gon take your love and put it with mine, baby

So it goes and so it goes
Time and time again
She walks into the starry night

As the waves hit the shore
Softly on the beach
The light hits her face
It glows this joy on her cheeks
She turns to me and says, "Look at the stars
How they shine for us
How they shine from Mars"

Every time she talks, she breaks my heart
My heart, it aches for you, girl
Oh, everything you do
Makes my heart glow for you

Everything that you do makes my heart glow for you
Everything that you say makes my heart drift away (Oh, everything you do)
Everything that you do makes my heart glow for you
Everything that you say makes my heart drift away

Gon' take your hand and put it in mine, baby
Gon' take your hand and put it in mine, baby
Gon take your love and put it with mine, baby
Gon take your love and put it with mine, baby

Oh, as the waves are rollin' to the shore
The light hits her face as the gold, it falls
I can see the sunshine in her eyes
She turns to me and she wants to go to town, have a drink
We can dance a while, we can kiss a little
Then walk home in the starry, starry night
(Everything that you do makes my heart glow for you)
(Everything that you say makes my heart drift away)
I'll tell you everything gonna be alright

Gon' take your hand and put it in mine, baby
Gon' take your hand and put it in mine, baby
Gon take your love and put it with mine, baby
Gon take your love and put it with mine, baby

Gon' take your hand and put it in mine, baby
(Should I take your hand, put it in mine, baby?)
Put it in mine, baby

(Yeah, yeah, yeah)
(Yeah, yeah, yeah)
(Yeah, yeah, yeah)
