

We Solid Gold

Dope Lemon

Once upon a time
In a small old coastal town
Lived a girl so pretty
One I thought that I'd never find

All the lights from the city
All the lights from the small towns
Couldn't draw me away from you
Want you 'round me all the time

When the dark clouds cross the sky
When the hurricane's inside your mind
When they barricade up the doors
When the sirens start to sound
When the shit gone hit the fan
When it all starts falling down

Yeah, I'll be right here waiting
No, I'm never gonna let you down
Won't let you go out alone in this
I'm never gonna let you down
We be Solid Gold, never gonna let you down

We be Solid Gold, never gonna let you down
We be Solid Gold, never gonna let you down
We be Solid Gold, never gonna let you down
We be Solid Gold, never gonna let you down

Where the bonfires flicker
Glow and gold on into the night
Stroll the beach looking for treasures
Them big blue eyes are shining bright
Them big blue eyes are shining bright

I'm never gonna let you down
Won't let you go out alone in this
I'm never gonna let you down
We be Solid Gold

We be Solid Gold, never gonna let you down
We be Solid Gold, never gonna let you down
We be Solid Gold, never gonna let you down
We be Solid Gold, never gonna let you down...

Never gonna let you down...
Never gonna let you down...
