Dorian Electra

The list goes on and on yeah
The list goes on and on yeah
Taking it back, painting it black
Goes it goes it goes on and on yeah

I do a little blasphemy as a treat
Instead of pressing send, yeah I press delete
I made a threat thinking that I should retreat
Back down, back down and admit defeat

I do a little blasphemy as a treat
I kiss a little ass then I take a seat
I better black it out, better press delete, press delete
Gonna white it out, going blank sheet

The list goes on and on yeah
The list goes on and on yeah
Taking it back, painting it black
Goes it goes it goes on and on yeah

The list goes on and on yeah
Got me feeling like on and on yeah
Taking it back, painting it black
The list goes on and on yeah

I do a light, a lil' fire just to feel the heat
As well as cooling down, yeah I take a seat
Before it hits the shelves, yeah it's obsolete, obsolete
Gonna shred it all, going so discrete

I pump a little iron just to get a grip
Gonna get shred, gonna let 'er rip
Dead pixels buried deep deep in the crypt
I gonna dig it up, gonna go script flip

The list goes on and on yeah
The list goes on and on yeah
Taking it back, painting it black
Goes it goes it goes on and on yeah

The list goes on and on yeah
Got me feeling like on and on yeah
Taking it back, painting it black
The list goes on and on yeah

On and on and on and on and on and on and on and on and on like...
Police me
Release me
Deceive me
Baby when you need me
My secret
I leak it
The list goes on and on like

The list goes on and on yeah
The list goes on and on yeah
Taking it back, painting it black

Can't stop me on and on yeah

Can't stop me on and on yeah

Never stop me on and on yeah

Taking it back, painting it black

The list goes on and on (What?)

On and on and on and on and on and on and on and on and on and on and...
